ACADEME PROJECTS

Game Development

Coding Chronicles
- Served as lead programmer for a 2D platformer game, developing the complete codebase and core gameplay mechanics.
- Created the majority of visual assets including character sprites and game elements, collaborating with team members who contributed additional artwork and background designs.
- Optimized performance across different hardware configurations to maintain consistent gameplay quality.

Mobile Application Development

Capstone Project: BulSUFind Lost and Found Application
- Implemented essential API integrations including Google Vision API for image recognition capabilities
- Developed real-time chat functionality using Firebase Firestore database
- Engineered push and in-app notification system for immediate user alerts
- Led backend architecture for core application features, ensuring seamless data flow between services

I hereby certify that the above information is true and correct to the best of my knowledge and belief.
